

Predict the next element with different types of mean.

Introduction

This app predicts a sixth element based on a previous input of 5 elements. There are 3 available types of prediction:

- Arithmetic mean: predicts the sixth element by calculating the arithmetic mean of the 5 imputed elements.
- Geometric mean: predicts the sixth element by calculating the geometric mean of the 5 imputed elements
- Harmonic mean: predicts the sixth element by calculating the arithmetic mean of the 5 imputed elements

Instructions:

Step 1:

Input the first 5 elements in the textboxes.

Please input the first 5 elements:

Element # 1

Element # 2

Element # 3

Element # 4

Element # 5

Step 2:

Select the type of prediction for the sixth element based on the input of **Step 1**:

Select the type of prediction for the element # 6:

Arithmetic Mean

Arithmetic Mean

Geometric mean

Harmonic mean

Step 3:

Enjoy! The prediction will be available to you in the right of the screen:

The prediction for element # 6 is:

5
